

Source Selection Log

Source: 02_source_inventory.csv and Appendix D of the final report

Search coverage

Search combinations included Dire Dawa flood, flash flood, preparedness, early warning, forecasting, evacuation, shelter, emergency health, vulnerability, drainage, recovery, community early warning, and flood preparedness behaviour.

Included sources

Sources were included when they provided direct Dire Dawa findings, local studies or cases, city-level diagnostics, technical analysis, or relevant vulnerability evidence. Six sources were included in the quality scorecard.

Excluded or pending sources

Administrative plans, monitoring records, health records, route and shelter maps, coordination notes, and other decision-critical documents were listed as missing or needing verification when the actual public document was not identified. General references without direct findings were excluded from primary synthesis.
